

EDUCATION EVOLVED

Art, Craft & Design

What materials are needed?

You will have the opportunity to purchase an art kit that has all the necessary equipment and materials e.g. sketchbook, folder, pencils, paints etc. This costs approx. £130 and can be purchased directly from the website.

How many projects do we do?

The first year has 4 projects each of which you will have the opportunity to build on your drawing, printing, painting and digital skills. In the second year there is one project and one externally set task.

Is there a lot of coursework to do?

You will need to build up a body of work over the two years that show depth of skill and knowledge.

Is there a written element to the course?

You will be helped and guided to write annotations to support your practical work throughout the course. In Y2 you are required to produce a written Related Study of 1000-3000 words.

How much artwork do we need to do at home?

You are expected to spend at least 4 ½ hours on homework.

Do we study the work of other artists?

You will experience many different and diverse artists throughout the 2 years. You will have the option to choose your own depending on what your interests and themes are.

Are there trips?

We visit local galleries and student art shows. We organise drawing days out to places like Bristol Harbourside. In recent years we have taken art trips to London's Tate gallery and the royal Academy.
